SUMMARY	Weekly Survey of Arab Affairs and Political Situation		

A. General Situation

1. [] report that Arab circles seem not yet to be fully aware of the full significance of the American change of policy toward Palestine, even though these circles claim to have expected a change at this juncture for some time. The sources claim that Arab policy remains unchanged, and that the forces under the direction of the Arab League have been ordered to continue any, if possible, to intensify their attacks on Jewish outposts and installations. Sources believe that these orders have been given more with a view to obtaining political than military advantages; the general feeling, allegedly continuing among Arabs that an attitude of intervention will obtain in their own country. In addition, a source claims that the Arab League has not received any instructions from other quarters to alter its previous policy.

2. The same source also claims that [] and his staff, who are concerned mainly with the military aspect of Palestinian affairs, are studying their plans for the occupation of the entire country. Sources claim to possess sufficient evidence that []'s strategy is being carried in coordination with other plans. The actual execution of []'s plans, is said to be in the hands of important Jewish officials on his staff, of whom there are said to be 35 in number. [] claims that the immediate strategy now being attacks to cut communications between Jewish settlements and the larger Jewish centers, in view of the fact that to date the Arabs have been unable to occupy a single Jewish settlement (the recent reinforcements have arrived when necessary) on a larger scale basis. [] also claims that all Arab plans are based on the assumption that Britain and the United States will not interfere on behalf of the Jews, so that the British navy will not attack a blockade of the Jewish coast. The same source alleges that while there is still considerable confusion and lack of sound financial policy among the Arabs, Arab League circles are relying on the accumulation of loot from the Jews to recover their military and to stabilize their economy when military operations have ceased. This idea, source claims, is being inculcated into the Arab forces by their leaders.
